

Aging & Disability Onboarding Training

The WellSky Training Center includes self-paced, onboarding training for the WellSky Aging & Disability solution. Many of the courses of the solution's curriculum allow the end-user (or learner) the ability to focus on the training best suited for their job role. All courses have Certificates of Completion available for download when the course has been finished.

Introduction to A&D

WellSky Aging & Disability enables agencies, providers, caregivers, and family members to maximize outcomes through coordinated delivery of home and community-based services. We work with hundreds of Area Agencies on Aging (AAAs) and several Aging and Disability Resource Centers (ADRCs) in support of the Older Americans Act and other services funded by federal grants and state and local funds.

A&D User Onboarding Training

This course prepares you to use the Aging & Disability applications. After completing this course, you will be able to navigate the Aging & Disability software, identify the life cycle of a patient record, the assessment process, and how to efficiently create service orders and track service deliveries. In addition, you will learn how to record daily activities that you will do on behalf of the consumer, and tips on how to make your work easier. As you progress through the course, assessments are available to evaluate your knowledge in the subject material you watched or read in each section of a lesson.

Take your organization's solution training to the next level with the experts at WellSky! Contact us today to learn more about WellSky Training Services and our curated, self-paced training programs.
