

Biotherapies Onboarding Training

The WellSky Training Center includes self-paced, onboarding training for the WellSky Biotherapies solution. Many of the courses of the solution's curriculum allow the end-user (or learner) the ability to focus on the training best suited for their job role. All courses have Certificates of Completion available for download when the course has been finished.

Introduction

The Biotherapies courses are designed for those who need to gain an understanding of the Biotherapies functionality within the **WellSky Biotherapies Clinic** and **Laboratory** applications. There are 2 separate courses, one for the Clinic functions and workflows, and the other is for Laboratory applications.

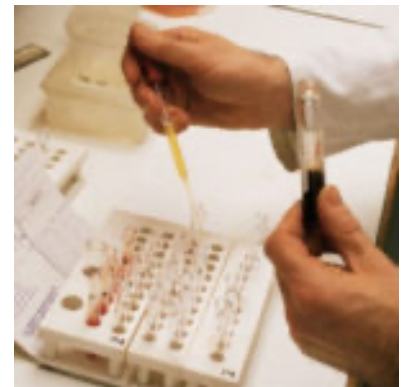

Clinic

This course is designed for those who are on the Clinic side of the Biotherapies world. Topics covered include patient registration, setting up referrals/consults, recording Pre & Post Transplant event data, planned therapy, ancillary services, and much more!

Laboratory

This course is designed for those who need to gain an understanding of the WellSky Biotherapies Laboratory workflows and functions. Typically this course is meant for those working with samples and tissues in the Laboratory setting, and covers the basics on how to navigate the application to perform various laboratory job functions.

Take your organization's solution training to the next level with the experts at **WellSky!** Contact us today to learn more about WellSky Training Services and our curated, self-paced training programs.
