

## Specialty Care Onboarding

### Training that is specific to each role.

The WellSky Training Center includes self-paced, onboarding training for the WellSky Specialty Care solution. The curriculum will teach you the best practices for using the Specialty Care solution. The team member will select their role/discipline so that all the training is specific to them. The lessons can be viewed at the learner's own pace.

**The Training Center can be accessed on any computer or tablet and can also be accessed on any cell phone – all you need is an internet connection.**

Participants in the online course can receive a certificate of achievement once they pass the assessment. This certificate helps you know that your team members not only watched the videos but can also recall the materials.

### Benefits:

- Uniform training – everyone gets the same educational material.
- Leadership and Team Members can leverage on demand learning to complement current scheduling needs.
- Each Team Member will get the recommended training specific to their role or discipline.
- Team Members don't learn the wrong way to do things.
- Reduced costs with no in person instructor or travel fees
- Self-paced & less frustration because Team Members can always re-watch the videos or watch the videos as they use the software.
- New Team Members get trained properly, not by what others can remember.
- Improved retention and recall.

Remove the fear of implementing a new software by providing comprehensive training that allows learners to move at their own pace and to go back and re-visit videos as the need arises.
