Training Center

Transfusion Onboarding Training

The WellSky Training Center includes self-paced, onboarding training for the WellSky Transfusion solution. Many of the courses of the solution's curriculum allow the end-user (or learner) the ability to focus on the training best suited for their job role. All courses have Certificates of Completion available for download when the course has been finished.

Introduction

This course is designed for those who need to gain an understanding of basic Blood Banking and Transfusion Service functionality within the WellSky Transfusion application. This course has one lesson Tile going over various introductory features of the WellSky Transfusion Solution with a short assessment at the end.

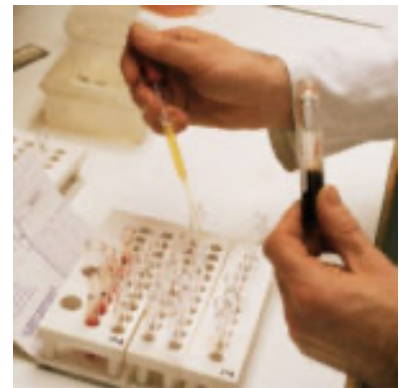

Application

This course is designed for those who have already completed the WellSky Transfusion Introduction course and need to gain a deeper understanding of WellSky's Transfusion application. Intended for new hires or users looking to refresh their knowledge. This training outlines how to use the WellSky Transfusion solution from start to finish. Typically, this course is meant for Blood Bank Transfusion Technologists, but can be modified to accommodate various job roles. This course is divided into eleven lesson Tiles based on the modules within the solution. Each lesson incorporates training videos, exercises, and assessments.

Configuration

This course is designed for those who need to gain an understanding of the build and configuration side of WellSky Transfusion. Typically, this course is meant for installers, contractors, administrators, or anyone who would need to build and maintain the WellSky Transfusion application. This course has one lesson Tile going over User and System Configuration, Facility Code and Control Tables, Building Common Test Order Codes, and an assessment.
